

Save the Date

March 8-9, 2012

Charlotte Convention Center, North Carolina

Learn about the region with:

- ✓ The largest offshore wind resource on the East Coast
- ✓ The lowest cost wind energy supply chain solution
- ✓ Over half of the East Coast's electricity demand

Network with developers, policy makers, manufacturers, and industry leaders to envision and plan for the future of wind energy in the Southeast

The 2012 Southeastern Coastal Wind Conference is a first-of-its-kind event that highlights Southeastern assets for wind energy deployment within the region. The conference is a **collaborative effort involving more than 40 regional stakeholders from Virginia, North Carolina, South Carolina, and Georgia**. Topics will include the region's supply chain, resource, and market strengths to educate decision makers about costs, benefits, and policy options for wind energy. Offshore and coastal onshore wind energy will be discussed at this conference with a concentration on offshore wind energy.
